

RAHUL GANGWAR

✉ rahulgangwar2625@gmail.com |  LinkedIn |  GitHub | Bareilly, India

Summary

Full-stack developer specializing in modern JavaScript ecosystems with hands-on experience building scalable web applications using React.js, Next.js, Node.js, and MongoDB/PostgreSQL. Experienced in designing REST APIs, implementing secure authentication systems, and building responsive user interfaces. Recently contributed to a production startup project involving large-scale React to Next.js migration.

Technical Skills

- **Programming Languages:** TypeScript, JavaScript, C, C++, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, Framer Motion, Responsive Web Design
- **Backend:** Node.js, Express.js, REST APIs, WebSockets
- **Databases:** MongoDB, PostgreSQL
- **ORM / Data Layer:** Prisma ORM, Mongoose
- **DevOps Tools:** Docker, Git, GitHub, npm, VS Code
- **Concepts:** Authentication Authorization, JWT, API Design, MVC Architecture, State Management
- **Deployment:** Vercel, Netlify, MongoDB Atlas

Experience

Software Developer - VerifyDev (Startup Project)

Jan 2026 – Present

Remote

- Led migration of production application from **React.js to Next.js**, refactoring **200+ files** to implement improved routing and architecture.
- Implemented modern rendering techniques including **Server-Side Rendering (SSR)** to enhance performance and SEO.
- Contributed **25+ merged pull requests** with over **5000 lines of code**, maintaining quality through peer code reviews.
- Collaborated with developers to fix production bugs and improve UI/UX across frontend repositories.
- Worked in an agile startup environment using Git workflows and feature branching.

Projects

iNotebook – Secure Notes Application

Sep 2025

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT

- Built a full-stack MERN notes application with secure JWT authentication and protected routes.
- Developed RESTful APIs enabling complete CRUD operations for user notes.
- Implemented Context API for state management and deployed the application using MongoDB Atlas.

E-Commerce Web Application

Oct 2025

Tech Stack: React.js, JavaScript, REST APIs, CSS3

- Built a responsive e-commerce platform supporting product browsing, filtering, and search features.
- Implemented shopping cart and checkout flow with user authentication.
- Improved performance using lazy loading and optimized component rendering.

Newsly – News Aggregator Application

Nov 2025

Tech Stack: React.js, TypeScript, News API, Tailwind CSS

- Developed a news aggregator with category-based filtering and infinite scrolling.
- Integrated external APIs with proper error handling and loading states.
- Designed responsive UI components for improved readability and user experience.

Education

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology in Computer Science

2023 – 2027
